

HAL Trust

Report on the first half year 2011

Interim report of the Executive Board HAL Holding N.V.	3
HAL Trust Interim Condensed Financial Report	6

First half year net income of € 304.9 million (+52%)

Net asset value decreases by € 43 million

during first half year 2011 (-0.7%)

Net income of HAL Holding N.V. for the first six months of 2011 amounted to € 304.9 million (€ 4.65 per share) compared to € 200.2 million (€ 3.05 per share) for the same period last year, representing an increase of € 104.7 million (€ 1.60 per share). This increase was primarily due to higher income from the quoted associates and capital gains from the real estate portfolio.

The net asset value, based on the market value of the quoted associates and the liquid portfolio and on the book value of the unquoted companies, amounted to € 5,776 million (€ 85.85 per share) on June 30, 2011. This represents a decrease of € 43 million (€ 0.66 per share) compared to December 31, 2010, taking into account the cash portion of the 2010 dividend (€ 60 million). The main reason for this change was the decrease in the share prices of the quoted associates. The net asset value does not include the positive difference between estimated value and book value of the unquoted companies. This difference is calculated annually and, based on the principles and assumptions set out in the 2010 annual report, amounted to € 863 million (€ 13.19 per share) on December 31, 2010.

During the period from June 30, 2011 through August 26, 2011, the value of the ownership interests in quoted associates and the liquid portfolio decreased by € 520 million (€ 7.73 per share).

The financial information in this report is unaudited.

Results

Revenues for the first half year amounted to € 2,013 million (2010: € 1,825 million) representing an increase of € 188 million (10.3%). Excluding the effect of acquisitions and currency exchange differences, revenues increased by € 97 million (5.3%).

Revenues from the optical retail companies for the first half year amounted to € 1,152 million (2010: € 1,078 million) representing an increase of € 74 million (6.9%). Excluding the effect of acquisitions and currency exchange differences, revenues from the optical retail companies increased by € 44 million (4.1%). The same store sales, based on constant exchange rates, increased by 0.7 % during the first half year when compared with the same period last year. The operating income of the optical retail companies (income before interest, exceptional and non recurring items, taxes and amortization of intangible assets but including amortization of software) for the first half year amounted to € 120 million (2010: € 121 million).

Revenues from the other unquoted subsidiaries for the first half year amounted to € 861 million (2010: € 747 million) representing an increase of € 114 million (15.3%). Excluding the effect of acquisitions and currency exchange differences, revenues from the other unquoted subsidiaries increased by € 53 million (7.1%). This increase is mainly a result of higher sales at Koninklijke Ahrend N.V., Broadview Holding B.V. and PontMeyer N.V. The operating income of the other unquoted companies (income before interest,

exceptional and non recurring items, taxes and amortization of intangible assets but including amortization of software) for the first half year amounted to € 46 million (2010: € 37 million). This increase is primarily due to the acquisition of a controlling interest in InVesting B.V. (€ 5 million), higher operating income from PontMeyer N.V. (€ 4 million) offset by lower operating income from AudioNova International B.V. (€ 5 million).

Income from marketable securities and deposits decreased by € 8 million to € 9 million primarily due to lower capital gains on the equity part of the liquid portfolio.

Income from associates increased by € 60 million to € 177 million primarily due to higher earnings from Koninklijke Vopak N.V. (€ 52 million) and Safilo Group S.p.A (€ 11 million).

Income from other financial assets increased by € 16 million to € 17 million primarily due to a € 12 million capital gain on bonds issued by Safilo Group S.p.A. as a result of a partial early redemption at par.

Income from real estate activities increased by € 48 million to € 52 million due to capital gains realized on the sale of an office building (€ 46 million before income taxes) and a development parcel (€ 3.5 million before income taxes).

Financial expense decreased by € 9 million to € 26 million primarily due to currency hedge transactions which, by their nature, did not qualify for IFRS hedge accounting through the equity statement.

Liquid portfolio and net debt

The corporate liquid portfolio at the end of June 2011 amounted to € 415 million (December 31, 2010: € 125 million). The increase of the corporate liquid portfolio is primarily due to the refinancing of the optical retail subsidiary GrandVision B.V. The consolidated net debt as of June 30, 2011 (defined as short- and long-term bank debt less cash and cash equivalents and marketable securities) amounted to € 626 million (December 31, 2010: € 678 million).

As of June 30, 2011 80% of the corporate liquid portfolio was invested in fixed income instruments (short term time deposits) amounting to € 333 million (December 31, 2010: € 35 million) and 20% in equities for an amount of € 82 million (December 31, 2010: € 90 million). The corporate liquid portfolio provided a total return of 1.3% during the first half of 2011 compared to (1.2%) for the same period last year.

Acquisitions

In March, the acquisition of a 45% interest in Atlas Services Group Holding B.V. was completed. Atlas specializes in supplying professionals to the energy and marine industry worldwide.

In April, the acquisition of an additional 47% interest in InVesting B.V., a company with a focus on the purchase of bad debt portfolios for its own account and risk and debt collection activities, was completed. HAL's current interest in the company is 58.7%.

Both acquisitions have been announced previously.

Risks

In the 2010 annual report, the Company included a description of risks associated with its strategy and its implementation such as, but not limited to: market value risk, interest rate risk, currency risk, credit risk, liquidity risk, concentration risk, acquisition risk and other risks. The descriptions of these risks are deemed to be incorporated in this report by reference. In the Company's view, these risk factors will continue to exist for the second half of 2011. We also refer to the statement on page 21 of this report.

Currency risk

As of August 26, 2011 the Company's currency translation risks with respect to net assets denominated in U.S. dollar (\$ 340 million) and British Pound (GBP 115 million) were hedged by forward exchange contracts. Today, the Company has discontinued to hedge these risks. This policy change increases the currency translation risks. However, the liquidity risk will decrease as the use of forward exchange contracts has an impact on the size of the liquid portfolio when the exchange rates of the hedged currencies change. Any future change to the currency hedging policy will be announced as and when it occurs.

Prospects

In view of the fact that a significant part of the Company's net income is determined by the results of the quoted associates and potential capital gains and losses we do not express an expectation as to the net income for 2011.

Notes to the Consolidated Interim Financial Statements

General

Reporting entity

The consolidated interim financial statements 2011 comprise HAL Trust ('the Trust'), a Bermuda trust formed in 1977, and its subsidiaries as well as the interests in associates and jointly controlled entities. HAL Trust shares are listed and traded on NYSE Euronext in Amsterdam. The Trust's only asset consists of all outstanding shares of HAL Holding N.V. ('the Company'), a Curaçao corporation. The consolidated interim financial statements have not been audited nor reviewed by an external auditor.

The Company's strategy is focused on acquiring and holding significant shareholdings in companies, with the objective of increasing long-term shareholders' value. When selecting investment candidates, the Company emphasizes, in addition to investment and return criteria, the potential of playing an active role as a shareholder and/or board member. Given the emphasis on the longer term, the Company does not have a pre-determined investment horizon. HAL also owns real estate. The real estate investment activities are concentrated in the greater Seattle metropolitan area with an emphasis on the development and rental of multi-family properties and office buildings.

Basis of preparation

Statement of compliance

The consolidated interim financial statements for the six months ended June 30, 2011 have been prepared in accordance with International Financial Reporting Standard (IFRS) IAS34, "Interim financial reporting" and were authorized for issue on August 30, 2011. This interim condensed financial report does not include all the information and disclosures as required in the annual financial statements and should therefore be read in conjunction with the annual financial statements for the year ended December 31, 2010. These financial statements have been prepared in accordance with IFRS. In the schedules on the following pages, the columns June 30, 2011 and June 30, 2010 represent the six-month periods ended June 30, 2011 and June 30, 2010. The column December 31, 2010 represents the twelve-month period ended December 31, 2010.

Due to the nature of the Company, investments and divestitures can have a significant impact on

net income. Accordingly, the results for the first six months might not be representative of the results for 2011 as a whole.

Estimates

The preparation of these interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the interim financial statements and the reported amounts of revenue and expenses during the reporting period. Although these estimates are based on management's best knowledge, actual results may ultimately differ from those estimates. Accordingly, it is reasonably possible that outcomes in future accounting periods that are different from the estimates and assumptions could have an impact on the carrying amount of the asset or liability affected. In preparing these consolidated interim financial statements, the significant judgements made by management in applying the accounting policies of HAL Trust and the key sources of estimation uncertainty were the same as those applied to the consolidated financial statements as of and for the year ended December 31, 2010.

Significant accounting policies

The accounting policies applied in these consolidated interim financial statements are consistent with those applied in the consolidated financial statements as of and for the year ended December 31, 2010 except for income taxes, which have been accrued using the tax rate that is expected to be applicable to the total annual profit or loss. The annual tax rate for the year ending December 31, 2010 was 27.7% (the estimated tax rate for the six months ended June 30, 2011 was 28.7%).

The International Accounting Standards Board (IASB) issued during the first half year the following standards:

- IFRS 10 Consolidated Financial Statements (including amendments to IAS 27)
- IFRS 11 Joint Arrangements (including amendments to IAS 28)
- IFRS 12 Disclosure of Interests in Other Entities

Notes to the Consolidated Interim Financial Statements

IFRS 13 Fair Value Measurement
Amendments to IAS 1 Presentation of Financial
Statements
Amendments to IAS 19 Employee Benefits

The above standards will be effective as from January 1, 2013, with earlier adoption permitted. The Company is reviewing the effects of these standards. The potential effects of the implementation of IFRS 11 and the amendments to IAS 19 are described in the 2010 annual report.

Statement by the Executive Board

The administrative procedures, the risk management and internal control systems associated with the Company's strategy and its implementation, the financial reporting and compliance are all designed to provide a reasonable degree of assurance that significant risk factors are identified, their development is monitored and, where appropriate, action is taken on a timely basis. The Board of Supervisory Directors is regularly informed about these matters.

The companies in which HAL has invested differ in industry, size, culture, geographical diversity and stage of development. Each company is subject to specific risks relating to strategy, operations, finance and (fiscal) legislation. HAL has therefore chosen not to institute a centralized management approach and not to develop a central risk management system. Each investee company has its own financial structure and is responsible for evaluating and managing its own risks. The companies generally have a supervisory board of which the majority of members are not affiliated with HAL. This corporate governance structure allows the operating companies to fully concentrate on developments which are relevant to them and to assess which risks to accept and which risks to avoid. Accordingly, in addition to risks associated with HAL's strategy and its implementation as referred to in the report on the first half year 2011 and which are further described in the 2010 annual report, there are specific risk factors associated with each individual investee company. It is the responsibility of each investee company to evaluate these specific risks.

HAL's objective is, in the context of the inherent limitations of the decentralized management approach described above, that its internal and external financial reporting is complete, accurate, valid and timely. Financial reporting risk can be defined as any event that impedes HAL to achieve its financial reporting objectives.

Based on the above, taking into account the inherent limitations referred to, we declare that, to the best of our knowledge, the condensed consolidated interim financial statements for the six months period ended June 30, 2011, which have been prepared in accordance with IAS 34 "Interim Financial Reporting", give a true and fair view of the assets, liabilities, financial position and net income of the consolidated entities taken as a whole, and the interim report of the Executive Board includes a fair review of the information required pursuant to section 5:25d. subsections 8 and 9 of the Dutch Financial Markets Supervision Act (Wet op het financieel toezicht).
